Education

New Mansoura University **Oct 2023 – Expected Jun 2027**
Bachelor of Science in Computer Science *New Mansoura, Dakahlia, Egypt*

Relevant Coursework

- Software Engineering
- Full-Stack Development
- Web Application Security
- HTML, CSS, JavaScript
- PHP, Laravel, OOP
- C++, MySQL, Data Structures
- Git, GitHub, CI/CD
- Bootstrap, Tailwind CSS
- UI/UX Design – Canva, Figma

Experience

Freelance Full-Stack Web Developer **Jan 2024 – Present**
Self-Employed | Remote

- Engineered end-to-end, production-ready web applications leveraging **Laravel, PHP, JavaScript**, and **MySQL**, consistently delivering on time and within scope.
- Architected and consumed **RESTful APIs**, implemented JWT-based authentication systems, and optimized complex database queries – achieving measurable performance improvements.
- Delivered robust CRUD systems built on **OOP principles and MVC architecture**, enforcing secure coding standards and industry best practices.
- Crafted responsive, pixel-perfect UIs using **Bootstrap and Tailwind CSS**, ensuring cross-browser compatibility and seamless user experiences.
- Deployed and administered production applications on **Ubuntu VPS** environments using **Nginx** and **aaPanel**, including domain linkage and SSL/security hardening.
- Managed full project lifecycle using **Git/GitHub**, Agile methodologies, and systematic debugging workflows to maintain code quality and client satisfaction.

Projects

National Training Foundation Platform – Laravel (Live) ntfeg.com **2025 – 2026**

- Architected and shipped a full-stack platform for a national workforce-training organization using **Laravel 11 and PHP 8.3**, featuring a modern, responsive **Dark Theme** public-facing interface.
- Built a comprehensive **course management module** enabling administrators to publish and update course offerings and track student enrollment requests in real time.
- Developed a full **recruitment system**, including a job-listings dashboard and an applicant-tracking workflow for reviewing and managing candidate submissions.
- Designed a custom **dynamic CMS** allowing non-technical staff to update site text, images, scholarships, contact details, and FAQs directly – with zero code changes required; modeled a relational **database (ERD)** for fast retrieval and precise role-based access.
- Owned the complete deployment pipeline end-to-end: provisioned an **Ubuntu VPS**, configured **Nginx** and **aaPanel**, and handled domain connection and server security hardening for production launch.

Student Management System **2025**

- Architected a full-featured **Student CRUD System** using **PHP, MySQL, Bootstrap, and OOP**, supporting scalable data operations across multiple academic entities.
- Implemented **role-based access control** (Admin / User) with secure session-based authentication and input validation to prevent common web vulnerabilities.
- Engineered a library of reusable, responsive UI components, reducing development time and ensuring visual consistency across all pages.

Article Management Platform – Laravel **2025**

- Designed and launched a full-scale **content management platform** built on **Laravel MVC**, supporting multi-user article publishing workflows.
- Developed advanced features including authenticated authoring, rich-text editing, category tagging, and a comprehensive admin control panel.
- Followed clean code conventions and structured the codebase for immediate deployment and long-term maintainability.

E-Commerce Web Application – Laravel **2025**

- Developed a feature-complete **E-Commerce platform** on Laravel, handling the full shopping lifecycle from product discovery to order fulfillment.
- Built a dynamic shopping cart, multi-step checkout flow, and a **high-fidelity admin dashboard** with real-time sales statistics and inventory control.

Hospitality Facility Finder System **Jan 2025 – Mar 2025**

- Spearheaded development of a discovery platform connecting users with **hotels, cafés, restaurants, and event venues** across multiple locations.
- Implemented advanced filtering by location, star rating, pricing tiers, and available services – boosting user engagement and search accuracy.
- Built a full-featured **admin panel** for facility onboarding, review moderation, and listing approvals.

Training & Certifications

Freelancing Skills Professional Course **2025**

National Telecommunication Institute (NTI) – New Mansoura

- Mastered end-to-end freelancing workflows: client acquisition and communication, scope definition, project delivery, and post-launch support strategies.

Front-End Web Development Intensive **2025**

Information Technology Institute (ITI)

- Completed an intensive program covering **HTML5, CSS3, JavaScript ES6+, Bootstrap 5**, and core UX/UI design principles with hands-on project deliverables.

Technical Skills

Languages: PHP 8.3, JavaScript (ES6+), C++, Java, HTML5, CSS3
Frameworks & Libraries: Laravel 11, Bootstrap 5, Tailwind CSS, Blade, WordPress
Core Concepts: OOP, MVC Architecture, RESTful API Design, ERD & Database Design, Data Structures, Secure Authentication, CRUD Systems
Server & Deployment: Ubuntu VPS, Nginx, aaPanel, Domain & SSL Configuration, Server Security Hardening
Tools & Platforms: Git, GitHub, VS Code, MySQL Workbench, Google Cloud, Figma, Canva
Soft Skills: Analytical Problem-Solving, Client Communication, Agile/Scrum, Time Management
